The General Education matrix is a listing of the general education courses offered at United Tribes Technical College (UTTC). Most, but not all, of the courses listed on the General Education matrix are based on GERTA (General Education Requirement Transfer Agreement), an approved set of general education courses that are transferable between North Dakota University System campuses and North Dakota's five tribal colleges. Some general education courses, such as Career Math, are not included on the matrix because they are specific to certificate or diploma programs and not applicable to degree programs.

Students who are planning to transfer to a different college or university should be informed about which courses will transfer, particularly the electives. It is the student's responsibility to contact the institution to which they intend to transfer to find out which courses will transfer. The Career Services Director is available to assist students with the transfer process.
